R. GUSTI RAHANA PUTRA

FULL-STACK DEVELOPER

gustirahana@gmail.com · +62 812-8437-1415 · gustispace.dev · linkedin.com/in/gustirahana

PROFESSIONAL SUMMARY

Full-stack developer with 4+ years of experience building production web applications and enterprise systems. Currently developing SSBO SaaS at PT Oka Iki Indonesia across Laravel, Vue.js, MySQL, automated verification, and release documentation, with a recent focus on Indonesian tax, payroll PPh21, accounting traceability, and Coretax-ready workflows. Earlier work spans React, Next.js, Node.js, PWA, RBAC, analytics, CI/CD, and government service modernization.

WORK EXPERIENCE

Full-Stack Developer · SSBO SaaS
Jun 2026 — Present

PT Oka Iki Indonesia · Full-time

- Responsible for building and maintaining core ERP modules, including HR, Payroll, Tax, and Employee Attendance.
- Developed employee lifecycle workflows such as employee data management, payroll calculations, overtime handling, attendance imports, and leave-related processes.
- Built tax-management features for Indonesian business requirements, covering PPN, PPh, payroll withholding, compliance checks, and Coretax-oriented export readiness.
- Implemented employee attendance and face-verification workflows by integrating mobile, backend, and biometric inference services.
- Designed secure APIs, database logic, role-based access, and operational dashboards to support reliable multi-user ERP operations.
- Collaborated across frontend, backend, and mobile layers to deliver end-to-end business features and production fixes.

Fullstack Web Developer
Jan 2025 — May 2026

PT Zevitsoft · Full-time

- Built REST API endpoints, React/Next.js interfaces, and MySQL/MariaDB schemas for production business applications.
- Engineered administrative dashboards with real-time tables, CSV export, secure RBAC, and reusable components.
- Delivered PWA capabilities with Firebase push notifications, service workers, and offline support.
- Created a Python, Streamlit, and Matplotlib dashboard for dormant-user analysis and configurable re-engagement targeting.
- Supported Docker-based delivery, Jenkins CI/CD, and deployments to Vercel and VPS environments.

Frontend Web Developer
Jan 2023 — Jan 2025

PT Zevitsoft · Full-time

- Built responsive React, Next.js, and Svelte applications and integrated complex REST APIs with secure JWT refresh handling.
- Developed reusable TypeScript UI systems, state management, visualizations, and searchable, paginated enterprise data tables.

Channel Relation
Feb 2022 — Dec 2022

PT Tera Data Indonusa (Axioo) · Contract

- Managed dealer, store-owner, and end-user relationships for Axioo products while supporting B2B/B2C sales targets.

IT Staff
Apr 2020 — Oct 2021

Ministry of Public Works and Housing (Kementerian PUPR) · Contract

- Modernized a government permit service from legacy HTML/CSS to Laravel and centralized offline registration workflows in a secure online database.
- Increased active-user engagement by 150%+ and reduced physical document submissions by 80% after the system revamp.
- Maintained LAN/WAN, servers, network devices, workstations, printers, and peripherals for reliable office operations.

TECHNICAL SKILLS

Frameworks & Frontend

Vue.js, React.js, Next.js, Svelte, Laravel, Node.js / Express, Framer Motion

Languages

JavaScript, TypeScript, PHP, Python, HTML5, CSS3 / SCSS

Data & Architecture

MySQL, MariaDB, REST APIs, RBAC, JWT, financial journals, audit trails, queue jobs

Tools & Delivery

Git, Docker, Vite, Jenkins, Cloudflare, Vercel, Firebase FCM, Streamlit, Figma, AI-assisted development

SELECTED ACHIEVEMENTS

- Shipped end-to-end tax and compliance capabilities for a distributor-focused ERP, connecting payroll, transactions, journals, validation, frontend UX, and release evidence.
- Delivered 20+ production pages serving 10,000+ users at PT Zevitsoft with a consistent on-time delivery record.
- Engineered mutex-based concurrent JWT token refresh to prevent authentication race conditions in high-traffic applications.
- Modernized a government service that achieved 150%+ active-user growth and an 80% reduction in physical submissions.
